

# Vibration Data Analysis Report

Generated on: 2025-03-26 12:18:01

## Vibration Data Analysis Results

| Parameter      | Value               |
|----------------|---------------------|
| Anomaly Status | No Anomaly Detected |
| Anomaly Ratio  | 0.00%               |
| Anomaly Score  | 2.9404              |

### ***Analysis Explanation:***

The vibration data analysis indicates no significant anomalies were detected. Only 0.00% of the data segments showed potential anomalous behavior. The system appears to be operating within expected parameters. No immediate fault diagnosis or further investigation is recommended at this time.
