

Vibration Data Analysis Report

Generated on: 2025-03-26 12:18:39

Vibration Data Analysis Results

Parameter	Value
Anomaly Status	No Anomaly Detected
Anomaly Ratio	0.00%
Anomaly Score	6.4339

Analysis Explanation:

The vibration data analysis indicates no significant anomalies were detected. Only 0.00% of the data segments showed potential anomalous behavior. The system appears to be operating within expected parameters. No immediate fault diagnosis or further investigation is recommended at this time.
